OCCITANIA IS THE 1ST REGION IN FRANCE TO ADOPT A GREEN BUDGET-----

The Region's initial 2020 budget stands at 3.53 billion euros, and includes 1.24 billion investments. Focused on a balanced development of the territory and the quality of life of the inhabitants of Occitania, it ensures the improvement of daily life and prepares for the future. In order to objectively assess its commitment to climate transition, the Occitania Region is the first in France to set up, from 2021, a rigorous classification of its expenditure. In collaboration with the Institute for Climate Economics each of them was assessed to see if they were beneficial for the climate. Thus, 26% of the expenditures of the 2021 Budget are very favorable (16%) or favorable (10%). And only 4% of regional spending has an unfavorable impact, such as air transport or national and departmental roads. The objective is to improve this impact each year in line with the "Positive Energy Region" strategy.-----

Finally, tourism, a major activity for the regional territory, will benefit from a budget of 87.5 million euros. It will make it possible to continue to support businesses and tourist establishments which have been hit hard by the crisis. But the ambition is also to support balanced and sustainable tourism development based on innovation, among other things through Tourism Passes and Contracts. (Source: Occitania Region)
